Sgt.

(101.)

Post Office Department,
TOPOGRAPHER'S OFFICE,
Washington, Oct 4, 1888.

Sir:

To enable the Topographer of this Department to determine, with as much accuracy as possible, the relative positions of Post Offices, so that they may be correctly delineated on its maps, the Postmaster General requests you to fill up the spaces below, and the diagram on fourth page, returning the same, verified by your signature and dated, under cover to this Office.

Respectfully, &c.,

David Enright
Topographer U. S. Dept.

To POSTMASTER AT

Springdale
Mason Co.,
Ky.

The (P. O. Dept.) name of my Office is

* Its local name is

It is situated in the North end of Precinct quarter of Section No. 7, in Township
(north or south), Range (east or west), County
of Mason, State of Kentucky Ohio

The name of the most prominent river near it is

The name of the nearest creek is

This Office is on bank of of said river, on the South side of it, and is 6
miles from said nearest creek, on the West side of it.

The name of the nearest Office on route No. 20025 is Chuster, and its
distance is 3 1/2 miles, by the traveled road, in a Western direction from this my Office.

The name of the nearest Office, on the same route, on the other side, is Concord
and its distance is 12 miles in a Eastern direction from this my Office. Manassas

The name of the nearest Office off the route is Stymusville, and its
distance by the most direct road is 2 1/2 miles in a Southern direction from this my Office.

This office is at a distance of 50 feet from the track Station of
the Maysville Big Sandy Railroad, on the South side of the railroad.

State, under this, the names of other Offices near your Office, in different directions from it, and their distances from it by the most direct roads.

* If the town, village, or site of the Post Office be known by another name than that of the Post Office, state that other name here, that it may be identified on the map of the State (or Territory).

☞ A diagram of the township and sections (or, where the land is not so divided, a sketch map), showing the precise location of your Office, together with the adjoining Post Offices, towns, or villages, the roads, railroads, and larger streams or creeks, in addition to the above, will be useful, and is desired.—(See diagram blank accompanying this, to be filled up.)

(Signature of Postmaster.)

Joseph P. Flowers
acting
Postmaster.(Date) May 24, 1938

DIRECTIONS

In the circle, let the dot represent your post office,

or

In the square, place a dot representing your post office in the proper quarter section;

then

Draw the following features, if within the area of the diagram, in proper relation to your post office:

Adjacent post offices (show with dot);

Railroads (show by line with cross-marks);

Main highways (name and show on margin name of town to which each road leads);

Rivers and creeks;

County line (show by dashes).

Letter the name on each item shown on the sketch.

Be careful to show each feature distinctly and draw according to the scale given under the diagram being used.

If a map of your town is available and can be furnished without expense, it should be marked with the location of your post office and forwarded for the files of the Division of Topography.

If such a map is furnished with the return of this paper, it is not necessary to fill out either diagram hereon.

Scale: 1/4 inch equals 1 mile

IMPORTANT.—A map or sketch showing the location of your post office must be submitted with the return of this paper. A printed map, such as prepared by the county or city engineer, is preferred, if it can be furnished without expense to the Department. Be sure, however, to mark on it the exact site of the post office, placing a small dot in the proper square or block and on the proper side of the street.

If a separate map cannot be furnished it is necessary to submit a sketch as described below.

These diagrams are furnished simply to make it easier to draw a sketch that will show correct distances from your post office.

SQUARE DIAGRAM

Use this diagram if your post office is located in an area described by section, township, and range, and you have filled in line 3 on the other side. Otherwise use the circular diagram.

Place a small dot representing your post office in the proper quarter-section and fill in the blanks for township and range numbers.

Then draw the following features:
(Note that one-half inch on the paper equals 1 mile on the ground.)

- Adjacent post offices (show with small dots and name).
- Railroads (show by single line with cross marks; name).
- Highways (show by double lines close together and mark U. S. and State numbers; name in margin the post office to which each road leads).
- Rivers, creeks, lakes, etc. (show by wavy lines and name).
- County line (show by dashes).

CIRCULAR DIAGRAM

Use this diagram if your post office is NOT located in an area described by section, township, and range.

Let the dot in the center of the circle represent your post office.

Then draw the features *a*, *b*, *c*, *d*, and *e*, as described above. (Note the scale of this diagram: One-quarter inch equals 1 mile.)

IMPORTANT.—A map showing the location of the post office must be submitted with the return of this paper. A highway map such as prepared by State, county, or local agencies is preferred, if it can be furnished without expense to the Department. Be sure, however, to mark on it the exact site of the post office, placing a small dot in the proper square or block and on the proper side of the street.

If no map can be furnished it is necessary to draw a sketch on one of the diagrams below.

INSTRUCTIONS

These diagrams are furnished simply to make it easier to draw a sketch that will show correct distances from the post office.

SQUARE DIAGRAM

Use this diagram if the post office is located in an area described by section, township, and range, and you have filled in line 3 on the other side. Otherwise use the circular diagram.

Place a small dot representing the post office in the proper quarter-section and fill in the blanks for township and range numbers.

Then draw the following features:
(Note that one-half inch on the paper equals 1 mile on the ground.)

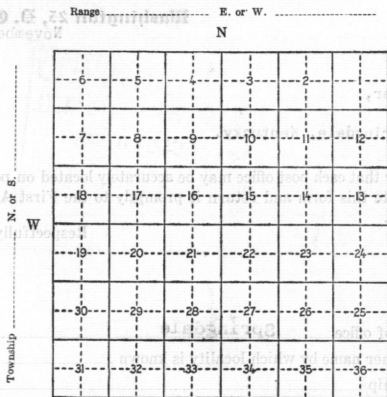

- Adjacent post offices (show with small dots and name).
- Railroads (show by single line with cross marks; name).
- Highways (show by double lines close together and mark U. S. and State numbers; name in margin the post office to which each road leads).
- Rivers, creeks, lakes, etc. (show by wavy lines and name).
- County line (show by dashes).

CIRCULAR DIAGRAM

Use this diagram if the post office is NOT located in an area described by section, township, and range.

Let the dot in the center of the circle represent the post office.

Then draw the features a, b, c, d, and e, as described above. (Note the scale of this diagram: One-quarter inch equals 1 mile.)

Scale: 1/4 inch equals 1 mile
